Hey Sasha!

On my end, the html mockup and finished versions appear to be posted around the same time, so I'll just leave you feedback for the final version. I know we obviously won't be creating another draft, but just in case you'd like to revise it later:

- I love the title and subtitle font! It gives off a very futuristic and sci-fi vibe. I thought it's a good idea to stick with the sans serif for the body paragraphs, but you could possibly try something else that's also more rectangular.

- The responsiveness is looking good, although I do feel like there could be some change in font sizes and image sizes that fit the phone screen more.

- It is pretty clear how the sections distinguish from each other, but I think you can use different colors for the subtitles, or white and blue colored lines that differentiate them from each others.

- There can be a page of many images that give the user a better idea of what VR is.

Thank you! It was great working with you!!

Best,
Tina
